

What makes Orville the best Popcorn.....

Expansion Ratio

Orville
1:50

Other
1:42

- ▶ **Moisture content:** 14% essential
- ▶ **The Popcorn Explosion!** Each kernel of popcorn contains water & oil, stored inside a circle of soft starch. As the kernel heats up, at a temperature of 180 C, the pressure causes the hull to break, causing the popcorn to "explode".
- ▶ Larger Popcorn pieces are more tender, light & fluffy, offering consumers a **burst of flavour**
