

# Wi-Py for Merchants

## OVERVIEW

**Wi-Py is aimed to provide a service that is more convenient than cash** (which is currently the most convenient method of payment) **and at the same time more secure.** We provide Merchants with a valuable tool to collect payments quicker and at a significantly lower cost than other payment methods. **Signing up for this service is quick and easy, and it is free of charge.**

**Merchant benefits:**  
easy to setup,  
no PoS retrofits,  
no new equipment  
or software.

**Very LOW  
withdrawal fee (1%)!!**

... offering  
**significant  
savings** over  
other methods  
of payment

## THE ONLINE PAYMENT SERVICE

**Wi-Py offers what we believe is the most convenient and fairly secure online payment service on the Internet.** Merchants can take advantage of this service by creating Wi-Py accounts for individual cashiers and ordering personalized Quick Response (QR) stickers for each one (you can print your own QR stickers or order them from Wi-Py.com by mail). The QR sticker includes the account name, eliminating spelling or typing errors, and is easy to scan at the Point of Sale. Customers waiting in line to make a payment can be in position to execute a payment within seconds by scanning the QR sticker. Information required for making a payment is limited to the amount, and an optional Memo (for reference). The processing is instant: both parties are notified and the account balances are updated instantly. At the end of a shift, the cashier can send a summarized balance report to the Merchant's account. A printout of the transactions details are also available.

**Wi-Py also provide 'Pay' and 'Donate' buttons,** easy to embed in your website pages!

YOUR **PHONE WALLET**

# Example of Merchant setup

Main account:

main@chain.ca

Store account:

store003@chain.ca

PoS Cashier account:

cash02-store003@chain.ca

**At the end of the shift, the Cashier would send the balance to the store account.** Once a month, or weekly, the store sends the balance to the Main account. Once a month (or as often as needed), the Main account makes a Withdrawal request to transfer the cash collected in that period over to the company's bank account. **Wi-Py.com charges a 1% (min \$2) withdrawal fee.**

We are constantly working to improve and add new services and new system features! Keep an eye on the desktop version, which will be updated first.

**Disclaimer:** Wi-Py is not as secure as a bank account and it does not provide guarantees against fraud, theft, or misuse of any sort. Please do not put more money in your Wi-Py account than you would normally keep in your wallet. Although the processing of transactions is safe, nobody can ensure that your account access will not be compromised by stolen phones or passwords. Please keep your phone, tablet or computer locked when not in use.

Wi-Py uses generated QR codes and Buttons for each account!

**Superfast and accurate** in acquiring Payee info
