

## CREATE ACRYTECTURE WITH ACRYTEC

**Woodbridge, Ontario – (CNW-November 19, 2015)** Acrytec Panel Industries is excited to announce that a new generation of *smart materials* is being added to their product line of finishes; *available for viewing at Construct Canada 2015.*

**Acrytec Panel Industries** is known for providing custom coloured, non-combustible cladding that is durable, visually appealing and long lasting. Their product has been installed in performance-demanding Germany for almost 40 years and is being specified for commercial, institutional and residential applications, which has led to Acrytec quickly becoming recognized for enhancing aged architecture; *'Create Acryitecture with Acrytec'*.

Acrytec takes their [role in protecting the environment](#) seriously. From their LEED® and ISO certification to their everyday commitment to sustainability, through their professional performance-tested product audits, they are always looking for new ways to raise the bar in their industry. Acrytec's clients can be reassured their project(s) will earn 2-4 LEED credits. In addition to being environmentally friendly, it's visually appealing – view their [portfolio](#) to see what Acrytec has done and *can do* for your project.

### NC25 & NC25 Insulated Are The Core Products

Acrytec's non-combustible, exterior cladding is ideal for the beautification of any exterior and has been known to increase curb-appeal, as well as increase a property's value. Incorporating an advanced rainscreen system and available in [eight striking finishes](#), Acrytec panels seamlessly combine quality and beauty. They come in 2 options: non-insulated (ACRY NC 25) and insulated (ACRY NC 25 INSULATED).

#### ACRY NC 25

#### ACRY NC 25 INSULATED

Their carefully constructed panels have been [performance tested](#) by multiple engineering consultants, demonstrating that Acrytec is a go-to source for architects, engineers, and designers in the North American marketplace. They're always interested in growing their reseller program as well and are an ideal partner for renovators and contractors.

### **New Faux-Wood Product Line – launching at Construct Canada!**

Acrytec is launching a new panel finish that has the stunning traditional appearance of wood and the durability and affordability of non-combustible, cement panels. You can now achieve a warm, organic, *wood look* with all the convenience of modern innovation.

*“A new generation of smart materials has just arrived at Acrytec’s headquarters in Woodbridge. It’s an exciting, wood grain imprint that will give architects, engineers, designers, renovators and the like, the option of offering our clients a natural, organic look with the strength and durability of concrete,”* says Bruno Matteo, President of Acrytec Panel Industries. *“We’re looking forward to unveiling this highly anticipated product at the upcoming Construct Canada show, taking place December 2-4<sup>th</sup> at the Metro Toronto Convention Centre, south building. Be sure to visit us at booth #845”.*

**About Construct Canada:**

Construct Canada is North America's Largest Exposition, Networking and Educational Event.

The 27th annual Construct Canada exposition takes place at the Metro Toronto Convention Centre (south building) from December 2-4<sup>th</sup>. This event offers over 1,600 exhibits and shows the latest in design, construction innovation in products, technologies, best practices and applications.
