### Remember....

Hackers are mean, fast, technically-savvy, ruthless with any 'cause' in mind.

Hackers have sophisticated ploys and operations plans.

Hackers are now successful in carrying out their 'cause'.

Hackers are now in the territory of fraud and illegal distribution of stolen data.

### And on the somewhat lighter side...

### Headline: Ashley Madison founder e-mails leaked in new data dump

E-mail messages linked to Noel Biderman, founder and chief executive officer of its Toronto-based parent company Avid Life Media.

*"Hey Noel, you can admit it's real now."*, In a message accompanying the release, the hackers said.

Lawyers have launched a class-action lawsuit seeking some \$760-million in damages on behalf of Canadians whose information was leaked.

Avid Life has indefinitely postponed the site's IPO plans.

Associated Press, August 21, 2015

#### Headline: Ashley Madison hack is a lesson in personal data online

Before you hit "submit," stop and think before giving up your personal information to any kind of website, said Michael Kaiser, executive director of the National Cyber Security Alliance in the United States, an industry-funded group that educates consumers about cybersecurity.

Wall Street Journal, August 21, 2015
